Paving Size Guide

Adding a patio to your outdoor space is a big investment, so you want to get it right. With so many different types of paving stones to choose from, it can feel like a minefield. We always recommend visiting one of our Landscaping Centres to take a look at our displays before you make a decision, below is a guide on the different size options offer and some important things to consider.

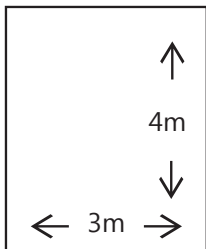

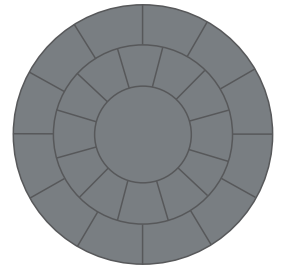

Patio Packs

Patio packs are a totally unique option that create variety and character to your landscape. This is a popular and low-cost alternative to laying generic, square or rectangular slabs. This is available in both our Porcelain and Sandstone paving range. Our patio packs consist of either three or four different sizes and can be purchased per square metre.

Circle Kits

Circle kits look great amongst larger paved areas but also create stunning focal points within your garden. Al fresco dining and outdoor entertainment are usually enjoyed on these smaller patios.

Available in our sandstone range only, these consist of two different sizes; two ring circle kits which measure 2.4 metres in diameter and three ring circle kits which measure 3 metres in diameter.

= 24sqm

How to correctly measure

It's important to measure your desired patio space to buy the correct amount of paving; we always advise buying 10% more to allow for off-cuts.

You can buy our paving by the square metre or by the number of paving slabs. To measure the square metre area of your desired patio, simply multiply the length of the area by the width.

Stone Zone Size Guide

It's important you choose the right sized stone for your landscape; you may have an idea of the stone size you'd like, but there can be some restrictions. For example, driveways need stones around 10-20mm; anything smaller isn't suitable. Use our to-scale size guide as a reference to the different sizes available.

Direct to Site Loads

Whether you're a landscaper or in the middle of a DIY project, we have the capacity to deliver as little as 1 tonne of aggregates, right up to 29 tonnes, with our own range of delivery lorries. Our smaller sized lorry allows delivery to sites with very tight access, while our reliable hauliers make any nationwide delivery a breeze. Our aggregates are brought to your site directly from the quarry, meaning the best prices can be passed on.

Let us know!

To ensure a safe and efficient delivery, our drivers need to know certain information to plan the delivery.

You must let us know of any restrictions:

Over-head cables - consider whether there are any cables above your property that could obstruct our lorries when tipping.

Trees/bushes - even these can be obstacles if they are large enough or low enough to prevent our lorries tipping.

Drain covers - our lorries cannot drive over drain covers due to the weight, you would need to find an alternative delivery space.

Limited access - If your property is situated within a narrow road, consider how accessible it is for our lorries to get through.

Driveway deliveries - you must fill out and sign our indemnity form if you'd like a delivery to be made on your driveway.

Remember...

- Our loose loads can be tipped onto any hard standing ground. We recommend laying tarpaulin for protection.
- The minimum width of space needed for any load up to 5 tonnes is 2.9 metres.
- The minimum width of space needed for any load between 6 - 20 tonnes is 3.3 metres.
- We're unable to offer time slots for deliveries as they will be made as economically as possible by using one route.
- The drivers will attempt to contact you 30 minutes before your delivery is due.
- All deliveries are made at the discretion of our drivers, if for any reason we cannot make a delivery a wastage charge may apply.

AQUA FLOW

Our Aquaflow Aggregates are suitable for SUDS (Sustainable Urban Drainage Systems). This replicates natural processes to aid drainage in and around properties and site developments. It works by slowing down and holding back excess water, allowing pollutants to be broken down naturally and then filtered back into the ground.

There are many benefits of SUDS, which include the prevention of water pollution and drought, as well as the reduction of flood risks. This solution is now widely recognised in built-up towns and cities and will soon be mandatory on all new major developments.

MUCKAWAY

Whether you're having a clear out of your garden or digging away a large mound of soil, our grab away lorries are here to help. From 6 tonne to 12 tonne capacity, we can clear your waste quickly and also combine delivery. Our fitted weighing system ensures accurate weight loads.

What do we grab away?

- ✓ Inert Waste
- ✓ Green Waste
- ✓ Active Waste
- ✓ Clay & Chalk

Before

After

Protect our planet

Have peace of mind knowing your waste is being responsibly recycled.

Top Tips...

- Our 12 tonne lorry will need a maximum reach of 4 metres, so consider any over-head cables or trees that could cause obstruction.
- If you'd like us to carry out the grab away on your drive, you'll need to sign a disclaimer form to consider any drains.
- Always try and keep waste separate, certain waste is cheaper to recycle than others; this can be discussed with our customer advisors.
- It's best to leave your waste in the centre of your garden/drive as opposed to leaving it against a wall or fence to avoid any damage.

A Stone Zone Original Soil & Turf Range

Building on our ever-expanding range of unique, blended soil, the Wessex brand was established in 2019, consisting of our award-winning turf and best-selling soils.

Each soil has a unique blend, designed specifically for different planting mediums. All of our soil is blended on-site, and contains organic, PAS 100 Compost.

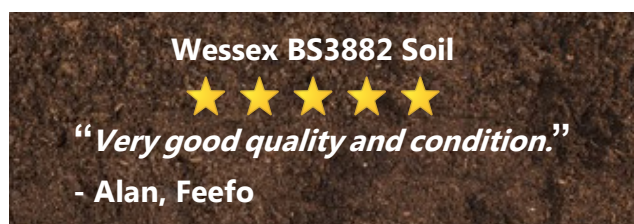

What is PAS 100 Compost?

Publicly Available Specification has been a widely-recognised compost quality standard within the organics recycling sector used for many years.

To ensure a high standard of compost, PAS is set by the British Standards Institution that requires producers to conform to this standard.

This product status is given in recognition of non-hazardous waste that only contains biodegradable materials; including peat-free green waste.

Blooming Great Ideas

All of our soils have been designed with both professional landscapers and everyday gardeners in mind.

Dutch Tree Sand

Designed with urban tree planting in mind, this sandy soil allows tree pits to remain free draining, whilst enduring heavy footfall and vehicles. This popular product is blended from graded silica sands and PAS 100 Compost.

Lightweight Rooftop Soil

Screened to 10mm, this unique blend of soil has been created for rooftop planting; a modern concept in urban areas.

This consists of sandy soil, coconut coir, PAS 100 compost and LECA (light expanded clay aggregates) which make a light soil with good structure.

We even make bespoke soils for your requirements!

Wessex Coolfresh Turf

Why choose Wessex Turf?

- ✓ Grown on fertile soils, using high quality ryegrass/fescue cultivators for the best appearance and performance.
- ✓ Fast root establishment; adapting well to its new environment, giving it the best chances of a thick lawn.
- ✓ Chilled during storage to extract the warm air and replace it with cool air, ensuring freshness and making it our Coolfresh turf.

WINTER RANGE

Protect your garden over Winter

Once your dream garden has been created, it's important to protect it over frosty seasons.

- ✓ Rock Salt to prevent frosty driveways
- ✓ Mulch to protect your plants
- ✓ Sealers to protect natural stone

Melt Away those Frost Fears...

Make your driveway safe and free from ice in the winter with our high performance, de-icing rock salt.

Consisting of a mixture of grit and salt, this rock salt will also create a guard against re-freezing.

Available in maxi bags and bulk bags through Autumn and Winter.

Cosy Up with Kiln Dried Logs...

Warm yourself throughout winter with our premium, kiln dried logs; perfect for log burning fires.

Ready to Burn Certified, these logs are sustainably sourced, free from chemicals and and long lasting.

Available in mini bags, crates and bulk bags through Autumn and Winter.

Perfect Plant Protection...

Use our best-selling Woodland Mulch to protect your newly planted borders over the Winter.

Just 3cm of Mulch on your perennials can help insulate the soil and prevent freezing and thawing.

Available in bulk bags throughout the seasons.

CORE Edging

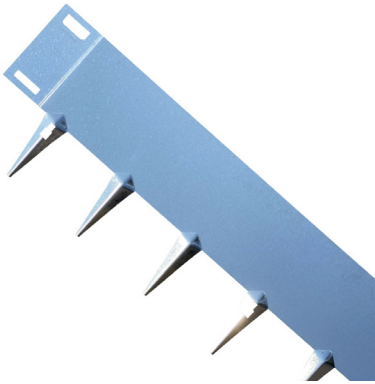

- ✓ Tidy borders and dividing garden features; suitable for tough ground conditions
- ✓ Flexible steel edging for easy installation with tough ground spikes and reinforcement fold
- ✓ Powder coated range is available in five different colours
- ✓ Three heights available: 65mm, 100mm and 150mm. Length measures 1075mm
- ✓ Three different finishes: galvanised steel, powder coated and cor-ten steel
- ✓ Expanding clip and galvanised rebar allows for additional reinforcement by 300mm

CORE Grids

- ✓ Providing the answer to creating a safe gravel path, driveway and access road
- ✓ CORE Path has a honeycomb structure with a geotextile membrane on underside
- ✓ CORE Drive is the UK's best-selling grid and can be laid on existing driveway surfaces
- ✓ Drive stabilising grids create a naturally porous base and is virtually invisible
- ✓ CORE Commercial Grids have been specifically design to withstand heavy traffic
- ✓ Commercial grids have a perforated base to achieve maximum strength without affecting the porosity of the surface

Edging and Grids

Galvanised Steel Edge

65mm, 100mm & 150mm

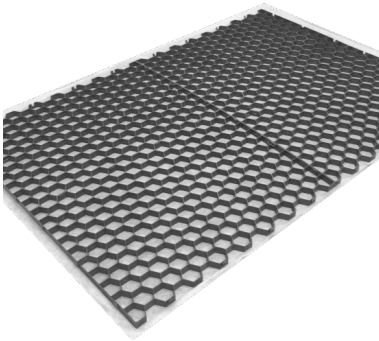

Powder Coated Steel Edge

65mm, 100mm & 150mm

Cor-Ten Steel Edge

65mm, 100mm & 150mm

Path Grid 38-18

475mm x 575mm

Drive Grid 40-30

1200mm x 1600mm

Commercial Grid 65-30

CORE Screens

- ✓ Stylish garden feature to spruce up indoor or outdoor walls as well as fences and sheds
- ✓ Available in five vibrant patterns to suit your desired garden style
- ✓ Features a 'frameless' design so multiple screens can be seamlessly joined together
- ✓ Available in three different materials; black composite, black metal and cor-ten steel
- ✓ Completely weather-proof; black metal and cor-ten are guaranteed for 25 years
- ✓ Two sizes available: 600mm x 1200mm and 900mm x 1800mm

CORE Planters

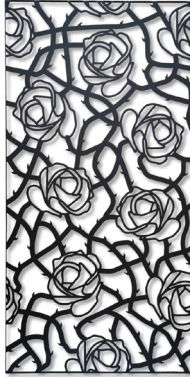

- ✓ These fashionable and functional planters can be used indoors or outdoors
- ✓ Designed to be attached to CORE Screens as well as used separately
- ✓ Comes with four adjustable rubber feet which screw into the reinforced base
- ✓ Also features pre-drilled drainage holes for excess water to escape
- ✓ Two sizes available: 600mm x 300mm x 300mm and 900mm x 400mm x 400mm
- ✓ Choose between a rounded or rectangular design, both available in black composite, black metal or cor-ten

We have BBQs, Firepits, and much more!

Everbuild are passionate about the products they produce, working on the simple premise that Trade users will only come back for good products, so that's all they make!

This simple philosophy combined with a commitment to invest in new product development and manufacturing infrastructure has seen Everbuild - A Sika Company grow into the UK's leading sealant, adhesive and building chemical brand.

Everbuild are owned by Sika AG, a globally active speciality chemicals company offering a comprehensive range of products.

Contractors PVA

Multi-purpose primer, sealer, cement filler and plaster mix.

Mortar Admix

A plasticiser that replaces lime for a mortar consistency.

Patio Wizard

Mould and algae treatment that kills and cleans green growth.

Aquaseal Liquid Roof

All-weather roofing system for a solid, waterproof membrane.

Surveyline

A colour-coded marking paint to spot mark.

Wonder Wipes

Anti-bacterial wipes for hands and equipment.

Got a question? We've got the answers

Q Is Porcelain Paving slippery?

A All our outdoor Porcelain Paving achieves the UK minimum requirement of an R11 skid value. Floor surfaces are measured between R9 and R13, R11 value means this will maintain good grip when wet, making it suitable for pool surroundings.

Q What's the best way of keeping my patio clean?

A It's best practice not to leave debris on your patio, and to sweep it regularly to avoid any marks or stains. It's always advised to jet wash this at least once a year; we recommend using Azpects Patio & Deck Cleaner for best results.

Q Can you give time slots for deliveries?

A We are unable to give specific time slots for deliveries, however, we can give you an exact date and an indication of whether it will be in the morning or afternoon. With your permission, we can also deliver when you're not there.

Q If I have more than one crate of paving, should I lay the slabs from one crate or randomly from different crates?

A If you've bought Sandstone or Limestone, it's best to randomly take from different crates because of the colour variance. If it's Porcelain, take from the same crate and ensure the batch numbers match as these should all be uniform.

Q Can I take a sample away?

A Yes. It's much nicer to see our product range in person to help you colour match existing garden features. We offer samples of our Paving, Stones and Soil which are available in-store and online (subject to availability).

Q What is your returns policy?

A We accept returns of any product within 28 days of purchase. Proof of purchase must be provided and the returned items must be unused and as sold. The customer is responsible for the cost of returning the product.

Q Do you carry out the landscaping work?

A We are the suppliers of landscaping and building materials and therefore don't provide this service. However, we are more than happy to recommend one of our trusted, regular landscapers that carry out work in your area.

Q How can I get an accurate quote for delivery in my area?

A Our website reflects our current prices. Simply find a product and type in your postcode; this will give you an accurate price including delivery to your area. For larger projects, we can give you a bespoke quote with direct-to-site savings.

Delivery Information

Our delivery lead time is 3-5 working days and takes place between 7am - 5pm Monday - Friday. However, you can pay an additional charge for next day delivery or Saturday delivery.

We are unable to give specific time slots for deliveries, however, we can indicate whether it will be in the morning or afternoon. With your permission, we can also deliver when you're not there.

Local Deliveries

We have a bespoke fleet of delivery lorries that have been specially designed for ease of delivery. Our local delivery area covers all of Dorset and Hampshire. A full list of these can be found at www.stone-zone.uk/pages/delivery-information.

Delivery costs can vary from product to product, but are generally priced per pallet load. For small orders, we recommend collecting from your local depot.

Good access is required for delivery; our lorries are approximately the size of a dust bin lorry. We have a smaller lorry for private/tight roads, where a surcharge will apply.

National Deliveries

For postcodes that fall outside our local delivery area, there is an additional charge per pallet load. Prices will vary depending on postcode and are priced based on our pallet network area charges.

These deliveries will always arrive on a pallet through a kerbside tail lift delivery. Good access is required (roughly the size of a dust bin lorry) where the driver will always deliver it as close to your property as possible.

We cannot provide time slots, however, you don't need to be there for delivery. If you'd like the driver to call en route, you can request this by emailing sales@stone-zone.uk.

Please note: There is a surcharge for deliveries to the Channel Islands, Scotland and Ireland.

Important Delivery Terms & Conditions

- It is the customer's responsibility to ensure adequate access to the delivery address.
- Customers must include any delivery instructions in the comments box at the checkout page. This includes access issues, whether you'll be there for delivery and any other notes for the driver.
- The road must be wide enough for large lorries, roughly the same size as a dustbin lorry. Overhanging obstructions may impact delivery such as overhead cables and trees. The height needed for hiab delivery is 4 metres.
- For delivery to areas in Dorset, we are able to use our small lorry for roads with tight access such as private roads or gravel drives. This will incur a surcharge.
- We operate a 'wasted delivery charge' for deliveries or muckaways that we are unable to complete due to insufficient access. This can be charged per delivery or per pallet for deliveries outside our local area.
- You must read and accept to these terms and conditions before proceeding with your order.
- Local deliveries can be delivered by ourselves in a crane mounted vehicle, with deliveries being made over fences where possible. These deliveries can be completed when you're not there.
- National deliveries will be carried out by a third party distribution network. These deliveries are carried out using a tail lift lorry, where the delivery driver will make a kerbside delivery on a pallet. Please note: these deliveries will be made on a specified date, between 8-5pm, you do not have to be there for delivery.
